1	The Clinical Context	1
1.1	Introduction	1
1.2	Renal Failure	1
1.2.1	Renal Failure in the Very Young	1
1.2.2	Protracted Renal Failure	2
1.3	Enuresis - Retention - Incontinence	3
1.4	Oliguria	4
1.5	Polyuria	4
1.6	Haematuria	5
1.7	Urinary Infection	6
1.8	Pain	6
1.9	Complexes, Syndromes and Conditions of a Generalised Nature	7
1.10	Conclusion	9
2	Investigatory Techniques	10
2.1	Introduction	10
2.2	Intravenous Urography (IVU)	11
2.2.1	Preparatory Details	11
2.2.2	Injection of Contrast Medium and Radiographic Techniques	11
2.2.2.1	Preliminary Film	11
2.2.2.2	Injection of Contrast Medium	11
2.2.3	Cavography	12
2.2.4	Timing of Radiographs	12
2.2.5	Radiographs of the Kidney	12
2.2.6	Imaging of the Ureters	15
2.2.7	Lower Urinary Tract	15
2.2.8	Reactions to Contrast Medium	15
2.3	Micturition Cystourethrography (MCU)	16
2.3.1	Radiological Techniques at MCU	17
2.3.2	Equipment	18
2.3.3	Sedation and Anaesthesia	18
2.4	Injection Urethrography	19
2.5	Retrograde and Descending Contrast Medium Studies by Injection	19
2.6	Ultrasonography	19
2.6.1	Preparation	19
2.6.2	Sedation	20
2.6.3	The Room	20
2.6.4	Equipment	20
2.6.5	Real Time Ultrasound Systems	21
2.7	Radioisotope Studies	23
2.7.1	Kidney Scans Using DTPA	23

2.7.2	Kidney Scans Using DMSA	24
2.7.3	Technique	24
2.7.4	Dose of Radiopharmaceutical	24
2.7.5	Pictorial Data	25
2.7.6	DTPA Scan	25
2.7.7	DMSA Scan	26
2.7.8	Analysis of Function by Isotope Study	26
2.7.9	The Problem of the Dilated Upper Tract	27
2.7.10	Radioisotope Cystography	27
2.7.11	Imaging of the Adrenal Glands	27
2.8	Angiography	28
2.8.1	Arterial Studies	28
2.8.1.1	Injection Technique	28
2.8.1.2	Control of the Examination	28
2.8.1.3	Complications	28
2.8.1.4	Local Complications at Catherization and Immediate Sequelae	28
2.8.2	Venous Angiography	29
2.9	Urodynamics	29
2.9.1	Indications	29
2.9.2	Method	29
2.10	Computed Tomography	30
2.11	Strategy and Tactics in Investigation	30
2.11.1	General Comment	30
2.11.2	Investigation of the Very Young Infant	30
2.11.3	Renal Failure in Infancy and Childhood	30
2.11.3.1	Acute Renal Failure in Infancy	31
2.11.3.2	Renal Failure in the Child	32
2.11.4	Haematuria	32
2.11.5	Objectives in Investigation	33
3	Obstruction in the Urinary Tract	35
3.1	Introduction	35
3.2	Acute Obstruction of the Kidney	35
3.2.1	The Role of IVU, Ultrasonics and Radioisotope Studies	35
3.2.2	Causes and Sites of Obstruction: Evaluation and Management	36
3.2.3	Late Consequences of Acute Kidney Obstruction	37
3.3	Protracted Obstruction	37
3.3.1	Summary: The Potential of IVU, Radioisotope Studies, MCU and Ultrasonics in Evaluating Protracted Obstruction	37
3.3.1.1	Sites and Causes of Obstruction Shown by IVU	37
3.3.1.2	Radioisotope Studies	38
3.3.1.3	Sites and Causes of Obstruction Shown by MCU	38
3.3.1.4	Sites and Causes of Obstruction Shown by Ultrasound	38
3.3.2	Defining the Site of Obstruction	39
3.3.2.1	Renal Changes Shown by IVU	39
3.3.2.2	Ultrasonics	40
3.3.3	Obstruction Proximal to the Bladder	41
3.3.3.1	Characteristic Findings	43
3.3.4	Causes of Obstruction to Bladder Emptying	45
3.3.4.1	Vesical Diverticulum	46

3.3.4.2	Bladder Neck Obstruction	46
3.3.4.3	Posterior Urethral Valves	46
3.3.4.4	Anterior Urethral Diverticulum	51
3.3.4.5	Distal Urethral Obstruction	52
3.3.4.6	Calculus Obstruction	52
3.3.4.7	Urethral Duplication	52
3.3.4.8	Urethral Stricture	52
3.3.5	Effect of Obstruction on the Bladder	52
3.3.6	Urinary Ascites and Perinephric Urinoma	57
3.3.7	"Non-Functioning Kidney"	59
3.4	Tactics in Investigation of Patients with Suspected Obstruction	59
3.4.1	Investigation to Establish Diagnosis of Obstruction	59
3.4.2	Evaluating the Upper Tract Problem in Lower Ureteric Obstruction	59
3.4.3	Role of Cystography	60
3.5	Monitoring Progress	60
4	Urinary Infection and Vesico-ureteral Reflux.	62
4.1	Introduction	62
4.2	Infection and the Bladder	62
4.3	Ureterovesical Junction: Functional Characteristics	63
4.4	Significant Factors in Vesico-Ureteral Reflux	64
4.5	Acute Kidney Infection and the Advent of the Pylone- phritic Scar	66
4.6	Sequels to Renal Scarring and Reflux	69
4.6.1	Differential Diagnosis of the Small Kidney	70
4.7	Investigations and Implications for Management in Urinary Infection	70
4.7.1	Indications for Surgical Treatment	70
4.7.2	Indications for Medical Management	71
4.7.3	Timing of Investigation	71
4.8	Collateral Considerations	71
4.8.1	Covert Urinary Tract Infection	71
4.8.2	Reflux in Families	72
4.9	Miscellaneous Urinary Infections	72
5	Nephrocalcinosis-Nephrolithiasis-Urolithiasis	74
5.1	Introduction	74
5.2	Causes of Nephrocalcinosis, Nephrolithiasis, and Urolithiasis	74
5.2.1	Nephrocalcinosis	74
5.2.2	Nephrolithiasis	74
5.2.3	Urolithiasis	76
5.3	Investigation	76
5.3.1	Techniques	77
5.4	Consequences of Calculi in the Urinary Tract	78
5.4.1	Acute Renal Obstruction	78
5.4.2	Obstruction and Atrophy of the Kidney	78
5.4.3	Recurrence of Urinary Infection and Continuing Surveillance	78
5.4.4	Pyonephrosis	80

5.4.5	Xanthogranulomatous Pyelonephritis	80
5.4.6	Perinephric Abscess	80
5.5	Miscellaneous Considerations Concerning the Lower Urinary Tract	81
5.6	Conclusion	82
6	Innate Abnormalities of Renal Development	83
6.1	Introduction	83
6.2	Abnormalities of Renal Parenchymal Development	83
6.2.1	Renal Agenesis	83
6.2.2	Renal Hypoplasia	84
6.2.3	Variants of Renal Rotation and Position	85
6.2.3.1	Malrotation	85
6.2.3.2	Ectopic Kidney	85
6.2.3.3	Fused Crossed Ectopia	85
6.2.3.4	Horseshoe Kidney	86
6.2.4	Dysmorphic Kidney	87
6.2.4.1	Dysplastic Kidney	87
6.2.4.2	Segmental Renal Hypoplasia	87
6.2.4.3	Cleft Kidney	87
6.2.5	Renal Cystic Disease	88
6.2.5.1	Congenital Renal Dysplasia with Cystic Changes	88
6.2.5.2	Polycystic Disease	91
6.2.5.3	Medullary Sponge Kidney	94
6.2.5.4	Medullary Cystic Disease: Juvenile Nephronophthisis	95
6.2.5.5	Syndromes Associated with Cystic Kidneys	96
6.2.5.6	Simple Cyst	97
6.2.5.7	Calyx Cyst	97
6.3	Absent Abdominal Muscles (Prune Belly) Syndrome and Variants	98
6.4	Duplication in the Kidney and Ureters	100
6.4.1	Simple Duplication	100
6.4.2	Simple Duplication with Complications	100
6.4.3	Complete Duplication with Small or Poorly Functioning Upper Component	100
6.4.3.1	Ectopic Ureteroceles	101
6.4.3.2	Urethral Ectopic Ureter	103
6.4.4	Duplex Kidney with Atrophic Features in the Lower Renal Component	105
7	Vesical and Urethral Problems	108
7.1	Introduction	108
7.2	Developmental Variants	111
7.2.1	Absence of Ureteric Orifice in the Normal Location	111
7.2.2	Exstrophy and Epispadias	111
7.2.3	Hypospadias	113
7.2.4	Persistent Cloaca	113
7.2.5	Persistent Urachus and Urachal Cyst	114
7.2.6	Duplication in the Bladder and Urethra	115
7.2.7	Anorectal Anomaly and the Lower Urinary Tract	115
7.2.8	Vesical Diverticulum	115
7.3	Neoplastic Disease	116

7.3.1	Rhabdomyosarcoma	116
7.3.2	Other Malignant Lesions	117
7.3.3	Non-Malignant Mass Lesions	118
7.3.3.1	Simple Polyps	118
7.3.3.2	Angioma	118
7.3.3.3	Myomas	118
7.4	Cystitis	119
7.4.1	Simple Cystitis	119
7.4.2	Cystitis Cystica	119
7.4.3	Tuberculous Cystitis	121
7.4.4	Bilharzia	121
7.5	Neuropathic Bladder	121
7.5.1	Causes	121
7.5.2	Characteristics	121
7.5.3	Cryptogenic Neuropathic Bladder	123
8	Acute Kidney Lesions	125
8.1	Introduction	125
8.2	Shock States and Kidney Damage	125
8.2.1	Antecedent Factors	125
8.2.2	Vulnerability of the Kidney to the Shock State	125
8.2.3	Tubular Necrosis	126
8.2.4	Medullary Necrosis	126
8.2.5	Renal Venous Thrombosis	128
8.2.6	Haemolytic Uraemic Syndrome	129
8.2.7	Cortical Necrosis	130
8.3	Nephritis	130
8.3.1	Acute Nephritis and its Evolution	130
8.3.2	Nephrotic Syndrome	130
8.3.3	Renal Damage as Part of Generalised Disease	131
8.3.4	Haematogenous Pyelonephritis and Acute Pyelonephritis	131
8.4	Miscellaneous Types of Kidney Damage	134
9	Renal Abdominal and Pelvic Masses	136
9.1	Introduction	136
9.2	Renal Neoplasms	136
9.2.1	Wilms' Tumour - Nephroblastoma	136
9.2.1.1	Clinical Presentation	137
9.2.1.2	The Renal Lesion	137
9.2.1.3	Extension and Dissemination	138
9.2.1.4	Staging of Wilms' Tumour	144
9.2.1.5	Follow-up Examination in Wilms' Tumour	145
9.2.2	Mesoblastic Nephroma	145
9.2.3	Renal Carcinoma	146
9.2.4	Other Tumours Affecting the Kidney	146
9.2.5	Conclusion	148
9.3	Non-Neoplastic Renal Masses and Lesions Simulating Masses	148
9.3.1	General Disease with Renal Masses	149
9.3.1.1	Tuberous Sclerosis	149
9.3.1.2	Hydatid Disease	149

9.3.2	Obstruction in the Urinary Tract	150
9.3.3	Cystic Disease in the Kidney	151
9.3.3.1	Multicystic Disease	151
9.3.3.2	Adult-Type Polycystic Disease	151
9.3.4	Ectopic Kidneys	151
9.3.5	Pseudotumour: Cleft Kidney	151
9.3.6	Disappearing Calyces	152
9.3.7	Renal Venous Thrombosis	153
9.3.8	Renal Abscess Formation	153
9.3.9	Perinephric Infection and Abscess	154
