

CONTENTS

Chapter 1. GENERAL PRINCIPLES OF THE PHYSIOLOGY OF THE ENDOCRINES	1
Phylogenetic Aspects of the Endocrines	1
Relation of the Central Nervous System to the Endocrines	2
Interrelationships of the Functions of the Pituitary Gland, the Target Glands and the General Body Cell Metabolism	3
General Chemical Nature of Hormones	6
Manufacture, Storage and Release of Hormones	7
Transportation, Activation and Inactivation of Hormones ..	7
Mechanism of Action of Hormones	8
Synergistic and Antagonistic Action of Hormones	9
Excretion of Hormones	9
Hormone Therapy	9
Chapter 2. THE PITUITARY	11
Anatomy	11
Physiology	15
Chemistry of Pituitary Hormones	45
Disorders of the Adenohypophysis	53
Dwarfism	79
Oxytocin and Vasopressin (Antidiuretic Hormone)	83
Hypothalamic-Pituitary Disorders	94
Chapter 3. THE THYROID	99
Anatomy	99
Physiology and Chemistry	100
General Considerations in the Diagnosis of Thyroid Disease ..	115
General Consideration of the Treatment of Thyroid Disease ..	117
Diseases of the Thyroid	119
Nonthyroid Disorders Treated by Altering Thyroid Function ..	212
Chapter 4. THE ADRENALS	221
ADRENAL CORTEX	224

Physiology of the Adrenal Cortex	224
Pharmaceutical Preparations Available for Clinical Use ...	237
Adrenal Cortical Hypofunction	238
Adrenal Cortical Hyperfunction	271
The Pharmacologic Use of ACTH and the Cortisones as Anti-inflammatory and Anti-allergic Agents in General Medicine and Surgery	294
Diseases Benefitted by Removal of the Adrenals	302
ADRENAL MEDULLA	307
Physiology of the Adrenal Medulla	307
Pheochromocytoma	309
Chapter 5. THE TESTES	316
Introduction	316
Physiology of Male Hormones	316
Clinical Considerations	320
Cryptorchidism	321
Delayed Adolescence	324
Deficiency of Male Hormone	327
Impotence, Homosexuality and Transvestism	333
Therapy of Male Sex Hormone Deficiency	334
Fertility and Sterility	339
Chapter 6. THE OVARIES	350
Normal Ovarian Physiology	350
Abnormal States	371
Estrogen in the Treatment of Metabolic Disease Not Strictly Hormonal	397
Chapter 7. THE PANCREAS	403
Metabolic Considerations	411
Diabetes Mellitus and Hypoinsulinism	419
Sequelae of Insulin Deficiency	457
Hypoglycemia and Hyperinsulinism	476
Chapter 8. DISEASES OF THE PARATHYROID GLANDS	483
Normal Function of the Parathyroid Glands, of Minerals, and of Bone	483
Hypofunction of the Parathyroid Glands	533
Hyperfunction of the Parathyroid Glands	541

Chapter 9. THE INFLUENCE OF THE ENDOCRINE GLANDS UPON GROWTH AND DEVELOPMENT	582
Relation of Genetic, Endocrine and Extrinsic Factors to Growth and Development	582
Methods of Studying Growth and Development	584
Specific Tests for Evaluating Hormonal Function	595
Types of Abnormalities of Growth and Development Encountered at Different Periods of Childhood and Adolescence	596
Congenital Anomalies of Development Sometimes Mistaken for Cretinism	598
Genetic Intersexuality vs. Female Pseudohermaphroditism Due to Congenital Adrenal Hyperplasia	601
Nonendocrine vs. Endocrine Causes of Stunted Somatic Growth	602
Constitutional Variations in the Pattern of Sexual Development	604
Summary	607
 Chapter 10. NEUROENDOCRINOLOGY	 609
Biologic and Ecologic Aspects of Neuroendocrine Function	609
The Adrenal Cortex with Special Reference to Stress and Abnormal Mental States	616
Neurohumoral Regulation of Carbohydrate Metabolism with Clinical Implications Thereof	619
The Ovaries	626
The Thyroid Gland, with Special Reference to Exophthalmic Goiter	630
The Hypothalamo-Hypophysial System in Adiposogenital Dystrophy	635
 Chapter 11. OBESITY	 645
Introduction	645
Measurements of Obesity	645
Etiology	648
Clinical Evaluation	655
Complications of Obesity	658
Treatment	659
Summary	664
800 Calorie Diet Outline	664
1000 Calorie Diet Outline	664
1200 Calorie Diet Outline	665

Chapter 12. LABORATORY DIAGNOSTIC AND ASSAY PROCEDURES .	667
Pituitary Hormones	667
Thyroid Hormone	686
Adrenal Hormones	698
Male Gonad Function	708
Ovarian Hormones	708
Insulin, Glucose, and Glucose-Insulin Tolerance Tests	712
Insulin	716
Parathyroid Hormone	717
Chapter 13. DIAGNOSIS AND TREATMENT OF	
ENDOCRINOPATHIES; HORMONE PREPARATIONS	733
Diagnosis of Endocrinopathies	733
Treatment of Endocrinopathies	736
Exogenous Hormonosis	738
Iatrogenic Hormonoprivia	738
Hormone Preparations and Routes of Administration	738
INDEX	745
