PREFACE

FIRST PART TO THE 7 mm. STAGE

1 OVUM TO THE TWO-LAYERED STAGE	3
Spermatozoon, ovum, zygote, morula, embedding, primary mesoderm, ectodermal and endodermal vesicles, chorion and amnion, early trophoblast.	
2 THE THREE-LAYERED PRESOMITE EMBRYO	15
Primitive streak, notochordal process, three layered embryo, neurenteric canal, intraembryonic coelom, neural folds, neural tube, somites.	
3 THE FOLDED EMBRYO	27
Folding off, stomatodaeum, Rathke's pouch, reversal, cloaca, blood islands, jelly space, mesenchyme.	
4 THE EARLY BLOOD VESSELS AND HEART	33
Angioblasts, vitelline and umbilical circulations, embryonic vessels, coelomic divisions, Y-shaped heart, primary chambers, chest wall, mesocardium, free heart, S-shaped heart, interventricular foramen, division of heart.	
5 THE PHARYNX	47
Optic cup, lens, otocyst, branchial grooves and arches, branchial pouches, thyroid and pulmonary diverticula, separation of trachea, aortic arches.	
6 THE BRAIN AND SPINAL NERVES	54
Fore-, mid- and hindbrain, neural crest, sensory ganglia, spinal cord, layers of cord, roots of spinal nerves, cranial nerves, control of growth, peripheral nerves.	
7 THE LIVER AND STOMACH	62
Hepatic diverticulum, trabeculae, veins of liver, primary loop of gut, mesentery, stomach, lesser sac, pancreatic buds, ductus venosus, sinus venosus.	
8 MESONEPHROS AND LIMB BUDS	71
Intermediate cell mass, mesonephric duct, mesonephros, inferior vena cava, cloaca, metanephric bud, limb buds, determination.	
9 SECTIONS OF 6 AND 7 mm. PIG EMBRYOS (30 DAYS)	79

SECOND PART 7 mm. STAGE TO BIRTH

10 FACE AND NOSE	103
Early face, nasal placodes and cavities, nasal fin, hare lip, mid-line anomalies, nerves of face, nasal septum.	
11 THE MOUTH	110
Palatal processes, cleft palate, choanae, lips and gums, teeth, tongue, salivary glands.	

12	BRANCHIAL ARCHES: THEIR VESSELS, SKELETON, MUSCLES AND NERVES	118
	Arterial arches, division of truncus, aorta, branchial skeleton and musculature, recurrent nerves.	
13	PHARYNGEAL DERIVATIVES	125
	Cervical sinus, pharyngo-tympanic tube, thyroid gland, para-thyroids, thymus, laryngo-pharyngeal orifice, trachea, lung.	
14	THE LATER HEART	134
	Superior vena cava, septum secundum, bulbar ridges, aortic and pulmonary valves, auriculo-ventricular valves, expansion of auricles, conducting system, foetal circulation, changes at birth, coarctation, tetralogy of Fallot, coronary arteries, lymphatics.	
15	THE PLACENTA AND TWINNING	147
	Expansion of amnion, umbilical cord, placenta, ectopic pregnancy, placenta praevia, twins, conjoined twins.	
16	THE ABDOMEN	159
	Greater omentum, portal vein, pancreas, liver lobules, lesser omentum, pleuroperitoneal membranes, intestines, Meckel's diverticulum.	
17	THE SUPRARENAL, KIDNEY AND CLOACA	174
	Suprarenal, renal tubules, migration of kidney, horse-shoe kidney, cloacal septum, vas deferens. Müllerian ducts, uterus and vagina, umbilical region, liver attachments, umbilical anomalies.	
18	THE GENITAL ORGANS	189
	Gonads, epididymis, genital swellings, penis, vaginal process, gubernaculum, broad ligament, breast.	
19	THE SKELETON	197
	Mesenchymal skeleton, interzones, primary centres, phocomelia, chondrocranium, skull at birth, achondroplasia.	
20	THE TRUNK AND LIMBS	204
	Myotomes, sclerotomes, vertebrae, spina bifida, muscles and tendons, bursae, limb arteries.	
21	THE NERVOUS SYSTEM	214
	Sympathetic system, spinal cord, brain, choroid plexuses, internal capsule, commissures, cranial nerve components, cerebellum, cerebrospinal fluid.	
22	THE MENINGES, EYE, EAR AND SKIN	227
	Subarachnoid and subdural spaces, eye, anencephaly, cyclopia, inner and middle ear, nails and hairs.	
23	CONTROL OF GROWTH	236
	Induction, organization, inhibition, hormone, teratomas, function, maturity.	
	NOTES ON SOURCES	243
	INDEX	247
